#LEODistanceLearning

- Each symbol is a different whole number each time

	=	6
-----------------------------------------------------------------------------------	---	---

... or maybe ...

	=	3
-------------------------------------------------------------------------------------	---	---

- Work out the first symbol is worth

	+		=	4
-----------------------------------------------------------------------------------	---	-----------------------------------------------------------------------------------	---	---

... so ...

	=	2
-------------------------------------------------------------------------------------	---	---

2	+	2	=	4
---	---	---	---	---

- Use this knowledge to work out the other symbol!

	+		=	7
-----------------------------------------------------------------------------------	---	-----------------------------------------------------------------------------------	---	---

... so ...

	=	5
-------------------------------------------------------------------------------------	---	---

2	+	?	=	7
---	---	---	---	---

	+		=	2
	+		=	3

	=	?
-----------------------------------------------------------------------------------	----------	----------

	+		=	6
	+		=	7

	=	?
----------------------------------------------------------------------------------	----------	----------

	+		=	10
	+		=	6

	=	?
----------------------------------------------------------------------------------	----------	----------

	+		=	4
	+		=	5

	=	?
-----------------------------------------------------------------------------------	----------	----------

	+		=	8
	+		=	6

	=	?
-----------------------------------------------------------------------------------	----------	----------
